CARWASH & CAR CARE

CONCENTRATED FOAMING DETERGENT FOR CAR PREWASH

- Optimal cleaning and emulsifying power.
- Remove the most difficult dirt.
- Easy to rinse.

SUGGESTIONS

Avoid prolonged contact on surfaces in aluminum and its alloys.
Do not let the product dry on the surfaces; work possibly in the shadow: spray the product homogeneously, possibly bottom up. On overheated surfaces, cool them down with some water before proceeding with nebulizing the detergent solution.

DESCRIPTION

Based on selected high quality surfactants, ONE PREWASH GL ensures an excellent emulsifying action of difficult dirt, including grease, dregs, smog and traffic film.
Dosed with foaming equipment, it creates a highly degreasing foam, easy to rinse, optimally preparing the car for the following washing steps.
It is delicate on the bodywork.
Usually, during the atomization phase, detergents of this category release acrid smells. On the contrary ONE PREWASH GL, thanks to its particular formulation, limits this effect.
Ideal for professional washing of tarpaulins, rims and wheels as well.
